DETAILED ACTION

1. This action is responsive to application filed on August 29, 2001. Claims 1-14 are pending examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Mukaiyama et al., U.S. patent No. 6,631,407 (referred to hereafter as Mukaiyama).

As to claims 1, 10 and 14, Mukaiyama teaches a method, computer program and system respectively for launching a browser or other service, comprising the steps of:

determining if a predetermined event has occurred (see col. 2 lines 2-30); and

sending a command to a system to launch the browser or service to a particular network location if the predetermined event is determined to have occurred (see col. 2 lines 31-57).

As to claim 2, Mukaiyama teaches the method as defined in claim 1, wherein the browser and/or service is launched after receipt of the command to launch (see col. 2 lines 31-57).

As to claims 3 and 11, Mukaiyama teaches the method and computer program as defined in claims 1 and 10 respectively, wherein the determining step comprises receiving information including a request to launch or other information relating to the predetermined event (see col. 2 lines 31-57).

As to claim 4, Mukaiyama teaches the method as defined in claim 3, wherein the receiving information step comprises the step of authenticating the received information and only sending the command to launch the browser and/or service if the request is properly authenticated (see col. 5 lines 35-53).

As to claims 5 and 12, Mukaiyama teaches the method and computer program as defined in claims 3 and 10 respectively, wherein the receiving information step comprises the step of listening on a network for requests to launch the browser and/or service or other information relating to the predetermined event (see col. 2 lines 31-57).

As to claims 6 and 13, Mukaiyama teaches the method and computer program as defined in claims 1 and 10 respectively, wherein the determining step comprises the step of polling a web site to determine if the predetermined event has occurred (see col. 2 lines 31-57).

As to claim 7, Mukaiyama teaches the method as defined in claim 1, wherein the predetermined event is an indication that a print job is completed (see col. 7 lines 7-col. 8 lines 11).

As to claim 8, Mukaiyama teaches the method as defined in claim 1, wherein the predetermined event is an indication that a print job has been interrupted (see col. 7 lines 7-col. 8 lines 11).

As to claim 9, Mukaiyama teaches the method as defined in claim 1, wherein the predetermined event is an indication that a job at a web service has been interrupted (see col. 7 lines 7-col. 8 lines 11).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Method for computer internet remote management of a telecommunication network element by Barker et al., U.S. patent No. 6,363,421
